

LOCKNCLIMB®

Airbus A320 MRO Ergonomic Safety Ladder Package

This 4-ladder package is designed to provide safe ergonomic service to all maintenance areas of the Airbus A320 aircraft. LockNClimb ladders are built in the USA using 6061-grade aluminum frames and stainless steel plate. They conform to all applicable OSHA and ANSI standards and are approved for GSA purchase (GS07F080CA). The four ladders required to service the Airbus are: 8WWCADET, 6LNCPYLON, 15LNCPYLON and 5AIRLNC.

KEY FEATURES:

Removable LockNTray positions tools close to the working area.

Black rubber padding on rails and treads protects aircraft finishes.

Safety stickers show compliance with OSHA and ANSI regulations.

LockNStands provide extra wide durable comfort while standing.

Aluminum single section ladder.

6061 aluminum support frame.

Rubber wheels allow easy rolling.

Folding rocker arms allow for easy transport and storage.

Removable brass or rubber feet.

The 6LNCPYLON allows close working access under the engine cowlings, aircraft pylon areas and in the engine shop.

Made in the U.S.A.

5AIRLNC fits in narrow cabin aisles, prevents damage to seat backs and arm rests.

15LNCPYLON conforms to the aircraft profile and allows access to difficult to reach areas.

8WWCADET allows stable working access to gear and wheel well electronics and maintenance points.
