

LOCKNCLIMB®

6LNCTRILEG INTERIOR CABIN LADDER FOR BOEING 777/787 & A350

6LNCTRILEG Allows technicians the ability to access overhead bins and cabin electronics without having to step on seat backs or arm rests while facing work directly without having to twist spine.

Made one at a time by skilled craftsmen in the U.S.A.

Specifications

6' fiberglass two-section ladder, OSHA rated 300-lb. Special Purpose, 72" H, 18" W, 25 LBS.

- Meets ANSI specifications.
- Patented 6061-grade folding tripod aluminum support base and frame.
- Yellow rubber padding on side rails protects interior aircraft surfaces from damage.
- Equipped with replaceable plastic feet and padded tripod foot.
- Stickers indicate OSHA/ANSI compliance.
- Made in the USA.

*"Ladders designed by technicians,
for use by technicians."*

Folding aluminum tripod leg with padded foot fits in the tight space between seats. Ladder folds for easy transport through the narrow cabin aisles.
