

# LOCKNCLIMB<sup>®</sup>

## 5MINIPYLON with Magnetic Line Tug Bracket

The Magnetic Tug Bracket holds the 5MINIPYLON securely when transporting on the flight line.

The Magnetic Tug Bracket is held in place by extra strong magnets.

[www.locknclimb.com](http://www.locknclimb.com)

The 5MINIPYLON is used to service the GPU ports, lower thrust reversers, lower fan cowl area, wheel well area, or nose gear of the Boeing 757 & 767, MD 10/11 and the Airbus A300 series.

Push pins secure the 5MINIPYLON inside the brackets.

Made in the U.S.A.
